ABOUT ME

Data Scientist turned Product Manager. **$17M+ in measured revenue gains** in roles across Systems Product Management, B2B2C SaaS Pricing and Analytics, and On-Demand Marketplace Operations.

Now deep into **Agentic AI**: building AI-native workflows automating new feature prototype and releases, customer campaign and comms, UAT, Reporting and Systems Integration.

KEY ACHIEVEMENTS

£1M ARR digital move journey PRODUCT
Mobile app deals in insurance, broadband and energy, ranked per household.

AI as QA, marketer, analyst AGENTIC AI
11 workflows building across 6 job functions.

$12M upsell PRICING
Freemium to pay-per-use over 15+ A/B tests.

$5M churn erased DATA SCIENCE
Churn and adoption product, 500K+ users.

€100K+/mo surge pricing MARKETPLACE
Basket size delivery-fee waivers lifted MOV by 21%.

+16% funnel lift EXPERIMENTATION
Built experimentation framework to ship/kill product releases.

SKILLS

Areas of Expertise

- Discovery & Roadmaps
- A/B Experimentation
- Funnel Optimisation
- Personalisation
- Mobile App Delivery
- Agile Delivery
- Agentic Workflows
- Data Pipelines & APIs
- Systems Integration
- Analytics & Reporting

Tools & Platforms

Python · SQL · R · Snowflake · BigQuery · AWS · PostgreSQL · MongoDB · dbt · Fivetran · Airbyte · Segment · Mixpanel · PostHog · Power BI · Tableau · Looker · Metabase · Salesforce · Gainsight · HubSpot · Customer.io · Zendesk · Linear · Jira

EDUCATION

B.S. Statistics & Economics
University of Minnesota · 2015 - 2019

- Mathematics minor
- Scholar of the College Award
- Awarded 3 international grants amounting to **+$14,000**

Why Surge Pricing may fail at Marketplaces
Correlation between dynamic incentives and inelastic supply.

The Invisible Hand
What economics says about AI and work.

A Decade of Statistical Computing
What new tools never replaced.

EXPERIMENTATION

Running Meaningful Experiments
Sample size, power, MDE, and the peeking problem.

When Demand Exceeds Supply
Surge pricing, demand forecasting, and supply incentives.

Rank, Reward, Retain
Ranking, reputation, and retention in two-sided marketplaces.

SYSTEMS ARCHITECTURE

Product Intelligence Platform
Architecture of a product intelligence platform.

Cost-Benefit Optimization
Cost-benefit optimization for delivery operations.

Data Engineering Foundation
Data engineering foundation for analytics.

EXPERIENCE

Just Move In — Remote

Product Manager — 2026 - Present

- Founded **WorkOS**, an internal AI product across **6 job functions**: Claude wired to 15+ production systems for UAT, bug triage, pipelines and reporting; SSO-gated dashboards **replaced enterprise BI**.
- Shipped the recommendation engine in the **mobile app** behind the **£1M ARR** digital move journey: live broadband, energy and insurance deals ranked per household across **580K mover journeys**.
- Replaced Service Ops' 28-tab spreadsheet with a ticketing product on HubSpot built on AI-native classification: auto-solved tickets rose **from 0.2% to 52% of 117K at 99.9% accuracy**, and the same team now handles **2.8x the moves, averting £100-175K/yr in hires**.
- Built an **AI call quality compliance platform** on the CRM, phone system and HubSpot: transcribes sales calls, rates sentiment and scores each on a 104-question checklist, **automating manual QA**.
- Built the sales analytics platform for phone sales, the largest channel: linked **1.4M calls to 880K moves** so leadership sees which agents, partners and products drive **~90% of phone revenue**.
- Launched a **multi-tier incentive compensation plan** for ~50 sales agents: weighted product points, an 8-tier accelerator ladder and a **call-quality gate on payout**, tracked on a real-time earnings dashboard.

Optimizely — Hybrid · Dhaka, Bangladesh · 2023 - 2026

Analytics Engineer, Product — 2024 - 2026

- Built the churn and adoption product over **500K+ users, erasing $5M of annual churn**, briefed quarterly to the CEO and Insight Partners; self-serve NLP agents retired **85% of ad-hoc requests**.
- Delivered the **Product Intelligence Platform**, the system of record **10+ SaaS product teams** ship against: one governed L1 engagement and L2 feature-adoption metric per product over **1.2M+ daily events**, an 8-step gating process that ended metric drift, and **70+ stakeholders** self-serving instead of queueing for an analyst.
- Built the experimentation platform **10+ product teams** ship on: a frequentist and Bayesian framework with a 5K-impression gate at 80% power, turning every launch into one ship-or-kill call. Lifted cross-sell qualification **58% to 74%**: **Running Meaningful Experiments**.
- Architected the move off Mixpanel onto a warehouse-native stack and ran the migration across **8 product teams in 6 months**, retiring a per-event SaaS bill and giving every team one governed definition to query: **Systems Architecture**.
- Built the warehouse it all runs on: 4 parallel ELT services, 3-layer dbt models above them and reverse ETL pushing scores into Salesforce and Gainsight; a Snowflake-to-BigQuery review traced **80-90% of spend** to egress and settled the platform decision: **Data Engineering Foundation**.

Senior Analyst, Go-To-Market Analytics — 2023 - 2024

- Built the forecasting product behind C-suite KPI targets, delivering **12% YoY ARR growth, beating the DXP benchmark by 7%**, and cutting leadership decision time 30% over a $50M+ pipeline.

Senior Analyst, Pricing Strategy & Operations — 2023

- Re-priced a global DXP (100K+ B2B customers) from freemium to pay-per-use over 15+ A/B tests: 40% gross margin hit, LTV +28%, **$12M upsell unlocked**.

Coto — Remote · Part-time

Analytics Consultant — 2024 - 2025

- Shipped the partner-ranking product behind 3M+ consultations, TOPSIS-scoring 500+ partners (300+ verified) on 5 criteria for reward and retention, **raising expert quality 23%**: **Rank, Reward, Retain**.
- Designed the dynamic pay engine holding **95% supply retention**: 30-90% revenue-share bands feeding the demand-supply engine for health scoring, surge pricing and escalation routing: **When Demand Exceeds Supply**.

foodpanda | Delivery Hero — Dhaka, Bangladesh

Assistant Manager, Logistics & Analytics — 2021 - 2023

- Owned last-mile operations on one of Bangladesh's largest consumer apps: **2M+ monthly orders** across 5 verticals and 50+ ops stakeholders, ML fleet forecasting compounding 3% monthly KPI gains at **75%+ on-time** delivery, and deployed the **national order dispatch policy** driving customer reorder-rate: **Cost-Benefit Optimization**.
- Shipped the return-order product, a daily compliance dashboard flipping cancelled-order billing across 2,200+ vendors: **€377K saved in a year**, food-quality complaints down 60.6%.
- Launched surge pricing across **64 cities**, generating **€100K+/mo incremental revenue and +21% basket size**; automated tooling and compliance penalties raised 16K-rider fleet performance 20%.

InsideMaps Inc — Mountain View, CA

Product Analyst — 2020 - 2021

- Shipped a MongoDB store and search product over 10K+ HVAC assets, **cutting costs $150K/yr** and raising project completion 20%; lifted efficacy 27% across 120 offshore operators on 3D tours.
