PRODUCT MANAGER • DATA SCIENTIST • AI ENABLER • MARKETPLACE OPERATOR

Every ↗ opens the work behind the number. [wahid-ratul.vercel.app](#)

EXPERIENCE

Just Move In

Product Manager

Remote

2026 - Present

- Own product end to end for a B2B2C marketplace moving **16K households a month**, earning commission on energy, broadband and insurance referrals: locate where that revenue leaks, set the roadmap against it, then build and measure the fix.
- Building the **digital move journey** against a **£1M ARR target in 6 months**: broadband, energy and insurance deals fetched live by API, personalising **40K+ mover emails** at a **52.9% open rate**.
- Built the company's **first funnel analytics for phone sales**, its largest revenue channel: **1.4M call records** stitched to **880K moves** across 3 databases. A daily digest tells each closer where revenue leaked; attribution covers **~90% of phone revenue**.
- Moved Service Ops off a **28-tab spreadsheet** into HubSpot ticketing: **9 AI workflows** route **49K tickets at 94% precision, 80% closing untouched**. The same 9 agents now serve **2.8x the moves**, averting **£100-175K/yr** in hires.
- Founded **WorkOS** ↗, the company's agentic operating layer: Claude wired to **15+ production systems** for briefings, campaign QA and reporting; **SSO-gated dashboards** replaced enterprise BI.

Optimizely

Hybrid · Dhaka, Bangladesh · 2023 - 2026

Analytics Engineer, Product

2024 - 2026

- Delivered the **Product Intelligence Platform** ↗, the company's system of record for product metrics: **1.2M+ daily events, 10+ SaaS products, 70+ self-serving stakeholders**, governed by an **8-step event-gating process**.
- Owned **Systems Architecture** ↗ for the analytics platform, authoring the decision records behind it: the **Mixpanel to warehouse-native migration**, recommended and driven across **8 product teams in 6 months**, and a **Snowflake-to-BigQuery evaluation** tracing **80-90% of cost** to egress.
- Engineered the **3-layer warehouse: 4 parallel ELT services**, a Kimball star schema, reverse ETL pushing metrics into Salesforce and Gainsight: **Data Engineering Foundation** ↗.
- Cut annual churn **\$5M** with churn and adoption models over **500K+ users**, briefed quarterly to the **CEO and Insight Partners**; NLP agents eliminated **85% of ad-hoc analyst requests**.
- Set the **frequentist and Bayesian experimentation standard** behind ship/kill calls: a **5K-impression gate at 80% power**, and a **+16% qualification lift (58% to 74%)** that became the cross-sell proof point: **Experimentation Science** ↗.

Senior Analyst, Go-To-Market Analytics

2023 - 2024

- Set C-suite KPI targets by forecast, delivering **12% YoY ARR growth at 7% above the DXP benchmark**, and cut leadership decision time **30%** over a **\$50M+ pipeline**.

Senior Analyst, Pricing Strategy & Operations

2023

- Re-priced a global DXP (**100K+ B2B customers**) from freemium to pay-per-use over **15+ A/B tests: 40% gross margin hit, LTV +28%, \$12M upsell** unlocked.

Coto

Analytics Consultant

Remote · Part-time

2024 - 2025

- Raised expert quality **23%** across **3M+ consultations** with a TOPSIS model ranking **500+ partners (300+ verified)** on 5 weighted criteria: **Rank, Reward, Retain** ↗.
- Held **95% supply retention** through scale-up with a dynamic pay engine: **30-90% revenue-share bands** plus performance multipliers.
- Built the **real-time demand-supply engine** running daily operations: health scoring, surge pricing and incentive orchestration in one control loop: **When Demand Exceeds Supply** ↗.

foodpanda | Delivery Hero

Assistant Manager, Logistics & Analytics

Dhaka, Bangladesh

2021 - 2023

- Owned **last-mile operations for 2M+ monthly orders** across 5 verticals, serving **50+ ops stakeholders**; ML fleet forecasting compounded **3% monthly KPI gains at 75%+ on-time** delivery.
- Proved by regression that algorithmic order stacking loses money past a **20-24% band**, refunds overtaking rider savings; adopted as national dispatch policy: **Cost-Benefit Optimization** ↗.
- Generated **€100K+/mo incremental revenue** and **+21% basket size** with surge pricing across **64 cities**; raised **16K-rider fleet performance 20%** with automated tooling and compliance penalties.

InsideMaps Inc

Product Analyst

Mountain View, CA

2020 - 2021

- Cut operating costs **\$150K/yr** and raised project completion **20%** with a MongoDB store and search engine over **10K+ HVAC assets**.
- Raised project efficacy **27%** running quality control across **120 offshore operators** delivering 3D tours.
