SUMMARY

Product Manager and Data Scientist: 7 years across marketplaces and enterprise SaaS, **\$17M+ in measured revenue impact**. I build the pipeline, define the metric, run the experiment and make the call, operating as a one-person, AI-native product function. Economist and statistician by training.

KEY ACHIEVEMENTS

- **\$5M churn removed**
Churn and adoption models across 500K+ users, briefed to the CEO and board.
- **\$12M pricing upside**
Global freemium to pay-per-use re-pricing; 40% gross margin, LTV +28%.
- **2.8x ops volume, flat headcount**
Service automation avoiding £100-175K/yr in hires.
- **€100K+/mo marketplace revenue**
Surge pricing and demand controls across 64 cities.

SKILLS

Languages (7+ yrs)

Python SQL R

EXPERIENCE

Just Move In

Product Manager

Remote

2026 - Present

- Own product end to end for a **16K-moves/month** B2B2C marketplace: roadmap, analytics, experimentation and CRM, working daily with **founders, Service Ops, Engineering and Growth**.
- Building the **digital move journey**, targeting **£1M ARR in 6 months**: API-fed live broadband, energy and insurance deals in the customer journey; first release put personalised broadband offers into **40K+ mover emails**, A/B/C tested.
- Architected the analytics stack: **Metabase pipelines wired to Claude over MCP**, cross-database data models, and **6 auth-gated dashboards on Vercel**, eliminating **enterprise BI spend**.
- Built the **first funnel analytics** for the largest revenue channel: **1.4M+ call records** joined to **880K+ moves**, reconciled to finance within **0.1%**; it opens the sales floor's morning: **where yesterday leaked revenue, who to coach first**.
- Leading the **HubSpot service migration**: Slack workflows **auto-creating tickets**, **Core-platform journey sync**, and **AI-powered chat** cutting agent dependency; automation absorbs **2.8x volume at flat headcount**, avoiding **£100-175K/yr** in hires.
- Created a zero-engineering **partner-acquisition product in HubSpot**: branded landing page, capture form, live list and alerts, demo-ready for a **national surveyor partnership**.
- Rebuilt **JMI's financial model in Claude**, unit economics and scenarios across every commission line: **board-level what-ifs answered same day**; plus **agentic tools** for stakeholder self-service on metrics and the funnel.
- Founded **WorkOS**, the company's agentic-workflow initiative: Claude integrated with **15+ production systems** for campaign QA, reporting and daily leadership briefings.

Optimizely

Hybrid · Dhaka, Bangladesh · 2023 - 2026

Analytics Engineer, Product Analytics

2024 - 2026

- Delivered the **Product Intelligence Platform**, the company's system of record for product metrics: warehouse-native analytics processing **1.2M+ daily events** across 10+ SaaS products, governed by an **8-step event-gating process** and L1/L2 metric design.
- Drove the **Mixpanel to warehouse-native migration** across **8 product teams**, my own recommendation; decisions incl. the Snowflake-egress cost evaluation: **Systems Architecture**.
- Engineered the 3-layer Raw → Transform → Reporting warehouse with **4 parallel ELT services**, a Kimball star schema and reverse ETL: **Data Engineering Foundation**.
- Reduced annual churn **\$5M** with models covering **500K+ users**, briefed quarterly to the **CEO and Insight Partners**; NLP agents for 70+ users eliminated **85% of ad-hoc analyst requests**.
- Set the **frequentist + Bayesian experimentation standard** behind ship / kill decisions: **5K-impression threshold (80% power)**, **+16% agent-qualification lift (58% → 74%)**, the cross-sell proof point: **Experimentation Science**.

Regional Analyst, Go-To-Market Analytics

2023 - 2024

- Set C-suite KPI targets with predictive forecasting: **12% YoY ARR growth**, **+7% over benchmark**; cut leadership decision time **30%** with real-time Power BI over a **\$50M+** pipeline.

Regional Analyst, Pricing Strategy & Operations

2023

- Re-priced a global DXP serving **100K+ B2B customers** from freemium to pay-per-use across **15+ A/B tests**: hit the **40% gross-margin target**, lifted LTV **28%**, unlocked **\$12M in upsell**.

Coto

Remote · Part-time

Analytics Consultant

2024 - 2025

- Improved expert quality **23%** across **3M+ consultations** with a **TOPSIS multi-factor ranking model** scoring **500+ expert partners (300+ verified)**: **Rank, Reward, Retain**.
- Held **95% supply retention** through scale-up with a dynamic pay engine: **30-90% revenue-share bands** plus performance multipliers.
- Built the **real-time demand-supply engine** behind operations: marketplace health scoring, surge pricing and incentive orchestration: **When Demand Exceeds Supply**.

foodpanda | Delivery Hero

Dhaka, Bangladesh

Assistant Manager, Logistics & Analytics

2021 - 2023

- Owned **last-mile delivery operations** for **2M+ monthly orders** across 5 verticals; ML fleet-supply forecasting compounded **3% monthly KPI gains** at **75%+ on-time** delivery.
- Ran the **cost-benefit optimization of algorithmic order stacking** (BigQuery / R): regression proof that refunds outweigh rider savings beyond a **20-24% band**, adopted as dispatch policy: **Cost-Benefit Optimization**.
- Generated **€100K+/mo incremental revenue** and **+21% basket size** with surge pricing and demand controls across **64 cities**; raised **16K-rider fleet** performance **20%** with automated tooling.

InsideMaps Inc

Mountain View, CA

Product Analyst

2020 - 2021

- Reduced operating costs **\$150K/yr** and raised project completion **20%** with a MongoDB asset store and search engine covering **10K+ HVAC assets**.
- Improved project efficacy **27%** leading quality control across **120 offshore operators** for 3D-tour delivery.
