EXPERIENCE

Just Move In — Remote

Product Manager — 2026 - Present

- Founded **WorkOS ↗**, an internal AI product across **6 job functions**: Claude wired to 15+ production systems for UAT, bug triage, pipelines and reporting; SSO-gated dashboards **replaced enterprise BI**.
- Shipped the recommendation engine in the **mobile app** behind the **£1M ARR** digital move journey: live broadband, energy and insurance deals ranked per household across **580K mover journeys**.
- Replaced Service Ops' 28-tab spreadsheet with a ticketing product on HubSpot built on AI-native classification: auto-solved tickets rose **from 0.2% to 52% of 117K at 99.9% accuracy**, and the same team now handles **2.8x the moves, averting £100-175K/yr in hires**.
- Built an **AI call quality compliance platform** on the CRM, phone system and HubSpot: transcribes sales calls, rates sentiment and scores each on a 104-question checklist, **automating manual QA**.
- Built the sales analytics platform for phone sales, the largest channel: linked **1.4M calls to 880K moves** so leadership sees which agents, partners and products drive **~90% of phone revenue**.
- Launched a **multi-tier incentive compensation plan** for ~50 sales agents: weighted product points, an 8-tier accelerator ladder and a **call-quality gate on payout**, tracked on a real-time earnings dashboard.

Optimizely — Hybrid · Dhaka, Bangladesh · 2023 - 2026

Analytics Engineer, Product — 2024 - 2026

- Built the churn and adoption product over **500K+ users, erasing $5M of annual churn**, briefed quarterly to the CEO and Insight Partners; self-serve NLP agents retired **85% of ad-hoc requests**.
- Delivered the **Product Intelligence Platform ↗**, the system of record **10+ SaaS product teams** ship against: one governed L1 engagement and L2 feature-adoption metric per product over **1.2M+ daily events**, an 8-step gating process that ended metric drift, and **70+ stakeholders** self-serving instead of queueing for an analyst.
- Built the experimentation platform **10+ product teams** ship on: a frequentist and Bayesian framework with a 5K-impression gate at 80% power, turning every launch into one ship-or-kill call. Lifted cross-sell qualification **58% to 74%**: **Running Meaningful Experiments ↗**.
- Architected the move off Mixpanel onto a warehouse-native stack and ran the migration across **8 product teams in 6 months**, retiring a per-event SaaS bill and giving every team one governed definition to query: **Systems Architecture ↗**.
- Built the warehouse it all runs on: 4 parallel ELT services, 3-layer dbt models above them and reverse ETL pushing scores into Salesforce and Gainsight; a Snowflake-to-BigQuery review traced **80-90% of spend** to egress and settled the platform decision: **Data Engineering Foundation ↗**.

Senior Analyst, Go-To-Market Analytics — 2023 - 2024

- Built the forecasting product behind C-suite KPI targets, delivering **12% YoY ARR growth, beating the DXP benchmark by 7%**, and cutting leadership decision time 30% over a $50M+ pipeline.

Senior Analyst, Pricing Strategy & Operations — 2023

- Re-priced a global DXP (100K+ B2B customers) from freemium to pay-per-use over 15+ A/B tests: 40% gross margin hit, LTV +28%, **$12M upsell unlocked**.

Coto — Remote · Part-time

Analytics Consultant — 2024 - 2025

- Shipped the partner-ranking product behind 3M+ consultations, TOPSIS-scoring 500+ partners (300+ verified) on 5 criteria for reward and retention, **raising expert quality 23%**: **Rank, Reward, Retain ↗**.
- Designed the dynamic pay engine holding **95% supply retention**: 30-90% revenue-share bands feeding the demand-supply engine for health scoring, surge pricing and escalation routing: **When Demand Exceeds Supply ↗**.

foodpanda | Delivery Hero — Dhaka, Bangladesh

Assistant Manager, Logistics & Analytics — 2021 - 2023

- Owned last-mile operations on one of Bangladesh's largest consumer apps: **2M+ monthly orders** across 5 verticals and 50+ ops stakeholders, ML fleet forecasting compounding 3% monthly KPI gains at **75%+ on-time** delivery, and deployed the **national order dispatch policy** driving customer reorder-rate: **Cost-Benefit Optimization ↗**.
- Shipped the return-order product, a daily compliance dashboard flipping cancelled-order billing across 2,200+ vendors: **€377K saved in a year**, food-quality complaints down 60.6%.
- Launched surge pricing across **64 cities**, generating **€100K+/mo incremental revenue and +21% basket size**; automated tooling and compliance penalties raised 16K-rider fleet performance 20%.

InsideMaps Inc — Mountain View, CA

Product Analyst — 2020 - 2021

- Shipped a MongoDB store and search product over 10K+ HVAC assets, **cutting costs $150K/yr** and raising project completion 20%; lifted efficacy 27% across 120 offshore operators on 3D tours.
